

AUTOMATED TOUCHLESS BIFOLD DOOR SYSTEM

Every door should work smarter.

Redefining hygiene. Saving space. Automating access.

THE INTELLIGENT DOOR SOLUTION

THE CHALLENGE AND THE SOLUTION

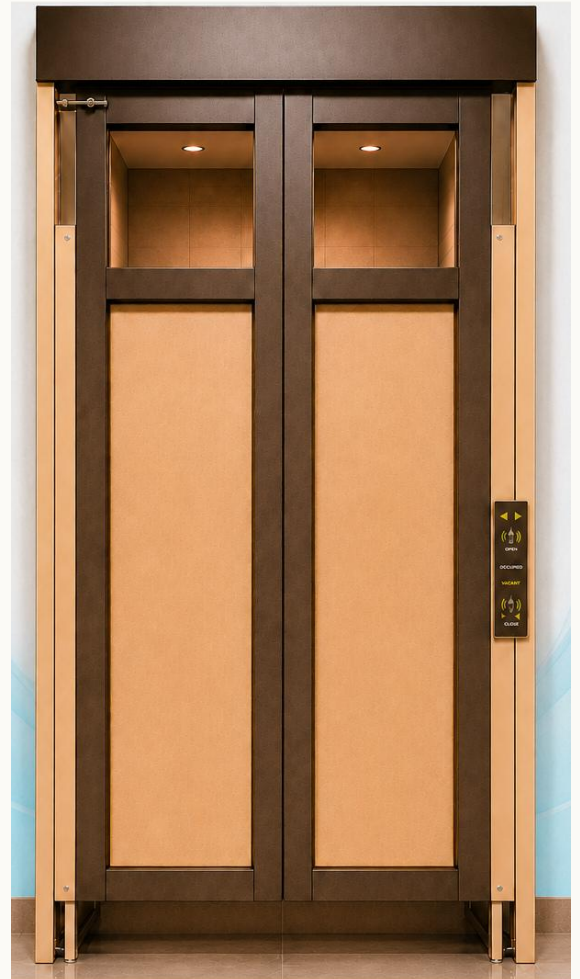

Modern buildings need a smarter door.

Traditional swing doors occupy valuable space and require physical contact. ANKA addresses the three needs that matter most in high-use commercial environments.

01 Reduce disease transmission

02 Improve accessibility

03 Maximize limited floor space

The ANKA solution: intelligent automation, touchless wave sensors, compact folding design, smart control, quiet operation, and retrofit installation.

WHY ANKA

Less contact. More usable space.

01

Touch-free hygiene

Wave your hand. The door opens automatically. No handles, pushing, or touching.

02

Save valuable space

The bifold design folds compactly to reduce clearance required by a swing door.

03

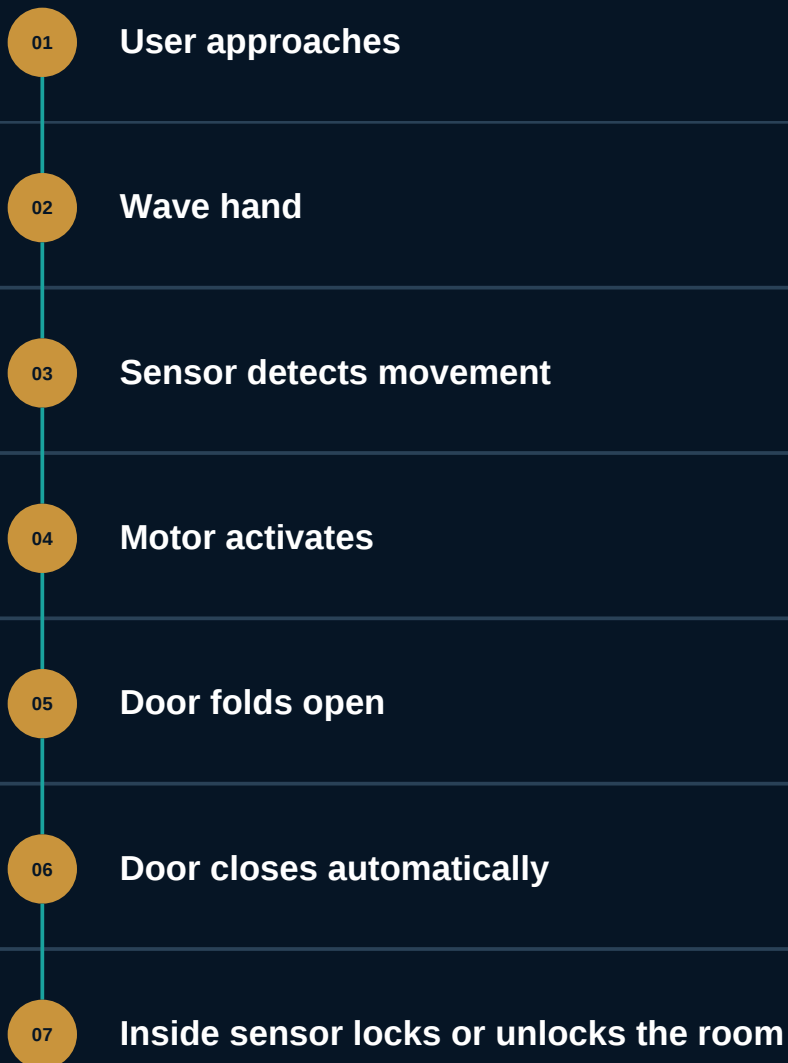

Smart automation

An intelligent microprocessor controller supports adjustable opening speed, closing speed, sensor sensitivity, hold-open time, diagnostics, and energy management.

Ideal for: public restrooms, medical clinics, hotels, office buildings, and airports.

HOW IT WORKS

One wave. One smooth movement.

A complete door system, not an add-on.

01

Precision roller technology

Smooth, quiet, and reliable operation.

02

Intelligent controller

Programmable operation, performance diagnostics, and energy management.

03

Modular construction

Replacement-ready components for simpler maintenance.

04

Retrofit ready

Installs in existing openings with minimal structural modification.

OPENING RANGE

40-80 inches

MAXIMUM HEIGHT

Up to 110 inches

CONFIGURATIONS

2-panel or 4-panel

Architectural flexibility.

INDUSTRIES WE SERVE

Built for high-use spaces.

Healthcare

Hospitals
Medical offices
Laboratories
Patient rooms

Commercial offices

Conference rooms
Executive offices
Employee facilities

Hospitality

Hotels
Resorts
Restaurants
Convention centers

WHY BUILDING OWNERS CHOOSE ANKA

Better for people. Better for the building.

01

Better hygiene

Reduce contact with high-touch surfaces.

02

Better space utilization

Recover valuable floor space.

03

Lower maintenance

Use modular replacement components.

04

Better user experience

Quiet, smooth, and reliable movement.

05

Better accessibility

Support hands-free entry.

06

Better investment

Designed for architects, facility managers, contractors, healthcare systems, and government projects.

SYSTEM CONFIGURATIONS

Designed to fit the project.

- 2-panel configuration

- 4-panel configuration

- Custom finishes

- Smart controller

- Battery backup option

- Retrofit installation

Modular construction and adjustable controller settings make it easier to align the door system with the opening, interior, and operating needs.

IDEAL FOR

One system. Many environments.

Healthcare

Commercial buildings

Hospitality

Education

Government

Public facilities

SMARTER DOORS BEGIN HERE

Plan a better entrance.

Tell us about your building, doorway, or retrofit project. ANKA Technologies can help identify the right configuration.
